

dB Broadcast Makes First Appearance at ABU Digital Broadcasting Symposium

*ABU Digital Broadcasting Symposium
Booth no. 18 / 19 - Light Way Electronics
4th to 7th March*

28th February 2014

Cambridgeshire, UK – Leading broadcast systems integrator and products supplier dB Broadcast will be exhibiting for the first time at the ABU Digital Broadcasting Symposium in Kuala Lumpur next month. Although based in the UK, dB Broadcast has many customers around the world, and looks forward to demonstrating the latest equipment and services to its existing and new potential broadcast clients.

The company will be demonstrating a range of new products including DVB-T2 broadcast monitoring solutions, for example, the acclaimed MERlin self-contained receiver for continuous off-air demodulation and monitoring of DVB-T2/T signals.

dB Broadcast has recently completed a number of major projects, including the UK DSO digital switchover programme and have supplied the MERlin DVB-T2 monitoring solution both for relay site RF monitoring and for cost effective RF monitoring at main transmitter sites.

“Along with our regional specialist reseller, Light Way Electronics, we are interested to meet broadcasters and other companies needing standard or custom approaches to technical problems”, said Mark Barnes, Technical Specialist at dB Broadcast. “Our team in the UK loves a challenge, and we keep them busy producing cutting edge technical solutions.”
